PROFILE

Experienced Junior Software Developer , specializing in web and mobile development. Knowledgeable in user interface, testing, deployment, documentation and debugging processes. Proficient in an assortment of technologies, including JavaScript , ASP.NET, C#, HTML & CSS, GIT, and SQL. Able to effectively self-manage during independent projects, communicate and work with clients as well as collaborate in a team setting.

EMPLOYMENT HISTORY

Junior Software Developer , ComputASSIST

Durban

Mar 2021 — Present

Working mainly on web and mobile based solutions where I have been given the responsibility of working on the full project life cycle. My responsibilities include the following.

- Conversion of legacy systems to web and mobile based platforms using both React and React Native libraries
- Creation of new web based systems comprising of both React front-end and C# back-end built from the ground up
- Documentation of all managed systems
- Project management using Jira
- Creation of UI Design using Adobe XD
- Creation of system workflows and components using Draw.io
- Debugging and system testing
- Tutorial videos and Training on all managed systems
- Deployment on both mobile and web based solutions
- Integration with existing systems between other departments using languages such as Visual Basic and Delphi
- Maintenance of managed systems and the App Store for mobile apps

Internship, Xact ERP

Durban

Nov 2019 — Dec 2019

Worked in their development programmer where as interns we were equipped with key skills to prepare us for the working environment, where our responsibilities included the following.

- Developing new and modern designs for their existing systems to improve user experience
- Creating various database schemas
- CRUD and SQL queries for newly developed features
- SCRUM project management and weekly catch up meetings
